

15-inch LCD monitor

Affordable, space-saving display

The smart choice is to look to the Philips 150S5 to save space and money with a great, reliable display for pumped up productivity. Plus 20 percent lower power consumption and affordable total cost of ownership.

Best total cost of ownership solution

- Up to 20% lower power consumption than industry average
- Kensington anti-theft lock secures monitor against theft

Outstanding front of screen performance

- Fast response time is capable of handling fast moving pictures
- XGA 1024x768 resolution for sharper display
- sRGB ensures color matching between display and printouts

Great convenience

- Embedded power supply eliminates external power adaptors
- VESA mounting pattern for easy wall mounting of display
- FlexiHolder to hold notes, cards, and photos

- User Manual : Yes
- Included Accessories : AC Power Cord, VGA Cable

Dimensions

- Depth (with base) : 170 mm
- Height (with base) : 364 mm
- Width (with base) : 342 mm
- MTBF : 50,000 (excl. CCFL 40,000) hrs
- Relative Humidity : 20 % - 80 %
- Temperature Range (Operation) : +5°C to +40°C
- Temperature Range (Storage) : -20°C to +60°C
- Weight : 3.6 kg

Power

- Complies With : E2000, Energy Star, NUTEK
- Consumption : 17 W (Typical)
- Power LED Indicator : Operation, Green; Stand by/Sleep, Amber
- Power Supply : Built-in
- Sleep Mode : < 1 W

Product Highlights

Fast Response Time

The amount of time it takes for a liquid crystal cell to go from active (black) to inactive (white) and back to active (black) again. It is measured in milliseconds. Lower numbers mean faster transitions and therefore results in fewer visible image artifacts.

Lower Power Consumption

Reduction of the electrical power required to operate a device.

Kensington anti-theft lock

A security device that fixes the monitor in place to prevent theft.

XGA, 1024 x 768 resolution

For graphics monitors, the screen resolution signifies the number of dots (pixels) on the entire screen. For example, a 1024-by-768 pixel screen is capable of displaying 1024 distinct dots on each of 768 lines, or about 786 thousand pixels. XGA provides the resolutions 640 by 480 or 1024 by 768 pixels and supports more simultaneous colors (65 thousand). In addition, XGA allows monitors to be non-interlaced. This ensures a better display performance and accurate color display effect.

sRGB ready

Calibrated RGB that is optimized for the vast majority of computer monitors, operating systems and browsers, so as to allow accurate color mapping with very little data overhead.

Embedded power supply

A power adaptor built into the body of a display device that replaces a bulky external power adaptor.

VESA mounting holes

A unified industry standard for mounting IT equipment set by the Video Electronics Standards Association.

FlexiHolder

A slim groove that improves efficiency by holding reminder notes, documents, name cards, or photos on the top of monitor.

As an Energy Star partner, Philips has determined that this product meets the Energy Star guidelines for energy efficiency.
